

5th Global Biodiesel Focus 2018

Highlights

Look at global & regional biodiesel, energy development; Analyze energy structure domestically and globally to present a clear picture of biodiesel share

Catch up with new market trends throughout government policies. Hear authorities from China, Europe, SEA Region and USA talking on the implementation of blending mandates

Explore downstream usage and by-product development. Search for potential usage of glycerin and other high profits

Get involved in global networking. Meet the biodiesel producers, trades, government officials, oil companies, technology providers as well as many other top executives

Event Background

In Indonesia, the Jakarta Post reports that the government is pushing its plan to roll out B30 to 2019 rather than wait until 2020 as originally planned. Tests operating vehicles using the higher blends have so far proven successful and a road test set for August is set to pave the way for early implementation of the B30 mandate. The government says that blends all the way up to 100% are viable in vehicle engines but it is concerns from manufacturers that are the greatest concern.

In Malaysia, Bloomberg reports that surplus palm oil supplies have seen the gap between biodiesel and fossil fuel prices reach the largest gap seen since 2014 with palm oil-based biodiesel reaching a discount of \$124 per metric ton last Friday. The gap has since narrowed to \$107 on Monday. With prices so low, exports could go as high as 380,000 tons this year. Export demand is typically triggered for discretionary blending when the discount is above \$100.

In Brazil, the Ministry of Mines and Energy published a new ordinance that increases the voluntary mixture of percentages of biodiesel mixture in regular diesel. The measure aims to expand biodiesel consumption in the country.

In Argentina, Reuters reports that if the European Union slams Argentine biodiesel exports with fresh anti-dumping tariffs in the next two to three months, that production could come to a screeching halt as 85% of exports would be cut off without an alternative market to flow into. Just the threat of potential new tariffs could see exports to Europe fall to as low as 700,000 metric tons this year compared to 1.65 million tons last year.

Given the changes in the market, ENMORE China will hold Global Biodiesel Focus 2018 to meet you for an open exchange of ideas, to take a glance at the progress made from policy into reality, and to set our priorities to move forward.

We are keen to see you in **soon!**

Why You Have to Attend GBF 2018

SEE THE GLOBAL & REGIONAL BIODIESEL, ENERGY DEVELOPMENT

What is the energy structure globally and regionally, what is the biodiesel share? Come and find the answers at GBF!

GOVERNMENT DIRECTION, NEW TREND, NEW DEMANDS? JOIN GBF TO STAY AHEAD OF THE MARKET UPDATES

Is the biodiesel market slowing down? It's too soon to say so! New government policy is coming out, new market is opening. GBF 2018 offers you latest updates to keep you one step ahead!

WHAT WILL BRING PROFIT YOU MAY NOT EXPECT? GBF NAVIGATES NEW OPPORTUNITIES!

Biodiesel, fatty alcohol, glycerin, surfactant, which is most profit? GBF explores the industry chain and provides you a great niche to easily gain more business opportunities & profit.

COMMUNICATE IN A PLATFORM WHERE YOU CAN REACH THE TOP OF THE TOPS!

GBF brings all together at once to save your time and make you great networking!

Who you will network with

PAST EVENTS AT A GLANCE

Event Background

- Global Biodiesel Focus 2018**
2018.12 | Jakarta, Indonesia
- Global Biodiesel Focus 2017**
2017.12 | Singapore
- Global Biodiesel Focus 2016**
2016.10 | Bali, Indonesia
- Global Biodiesel Focus 2015**
2015.12 | Singapore
- Global Biodiesel Focus 2014**
2014.12 | Bali, Indonesia

"Well organized and good for networking"
--Shashank Sukumaran

"I found the conference very valuable!"
--Yuan-Sheng Yu

"good topics and much focused on biodiesel"
--Esther Ng

Previous Speakers

A. Dato' Ir Jamlus Aziz
CEO
Felda Palm Industries Sdn Bhd

Henri-Jean Bardon
Managing Director
Solfuels Pte Ltd

Esther Ng
Editor
Platts

U.R. Unnithan
Deputy President
Malaysia Biodiesel Association
Managing Director (MBA)

Immanuel Sutarto
Advisor
Indonesia Biofuels Producer
Association

Roberto Vazquez Lucerga
CEO
ASB Biodiesel

Tatang H. Soerawidjaja
President
Indonesia Association of BioEnergy
Scientists and Technologists

Yu Jing
Deputy Chief Engineer
China National Petroleum &
Chemical Planning Institute
(NPCPI)

Liu Dehua
Director of Institute of Applied
Chemistry
Tsinghua University

Yuan-Sheng Yu
Research Associate
Lux Research
